The PERCS Index Inc.

Equipment Tracker + For Windows™

Equipment Tracker Plus by The PERCS Index is designed to automate the processes involved with the daily issuing and returning of equipment. This is achieved through the use of Windows™ technology, advanced screen layouts, sophisticated database design and bar code technology. The increased efficiencies of automating this traditionally manual process is directly translated into savings in manpower hours in the signing in and out process and through the ability to instantly locate and track usage of all equipment.

Tracking Equipment

Equipment Tracker Plus simplifies the daily task of issuing and receiving equipment. A bar code label is created for each piece of equipment and for each officer who will be issued equipment. When an item leaves the storage locker, its bar code is scanned along with the bar code of the officer. To return an item, simply scan the attached bar code. The system automatically records these transactions so that you can instantly determine the status of all pieces of equipment. New features include grouping equipment by Category and assigning a time when equipment is due for return.

Simple to Use

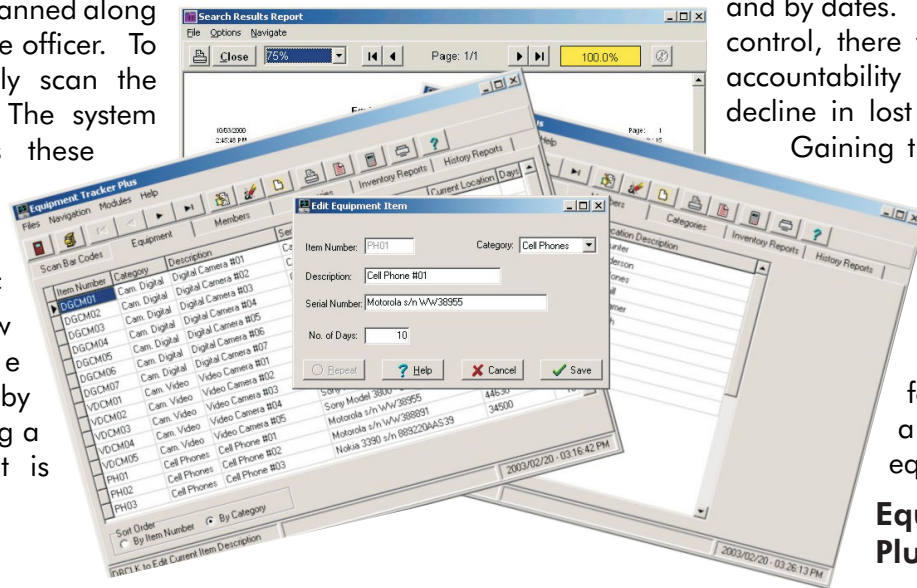

Equipment Tracker Plus utilizes the latest in screen design concepts to minimize the learning curve of users familiar with standard Windows™ protocols. A fully featured on-line Help system is included to answer any questions a user may have. The use of bar code technology enables equipment to be issued and returned by using a simple 'point and shoot' procedure. Extensive reporting capabilities provide tracking and historical analysis of all equipment usage.

Return on Investment

With Equipment Tracker Plus, you will realize a substantial saving in the time and effort required to control the issuance and receipt of equipment. Through the extensive reporting capabilities of Equipment Tracker Plus, items can be tracked by usage and by dates. With this improved control, there will be more user accountability with a resultant decline in lost or missing items.

Gaining the ability to more closely monitor equipment usage allows you to better manage the allocation of funds for replacement or addition of equipment.

Equipment Tracker Plus Components

Basic Package includes:

- * Equipment Tracker Plus software
- * 4,000 heavy duty 3M labels with printer ribbon
- * One year of Technical Support

Equipment required not included:

- * PC with Windows™ 98, 2000 or NT
